

Hello Kath, Graeme, and the members of the Rotary Club of Ocean Grove,

How was your day? For me, I am doing good.

I would like to share with you what I did in July. I trust you will enjoy reading my email.

I want to talk about my education results in July. I just completed my midterm exam for two classes and another one. I already finished it but have not yet gotten the grade. I got an A+ in gender class and an A in communication class. I cannot wait to hear the result of my ASEAN class soon. My gender class will have a trip this week on the 4th. And my teacher encouraged students to join the school trip, and I also decided to join the trip. So, I have to spend 12\$ for the bus, breakfast and lunch. In this term, I learned so much. I especially like the communication and gender class the most because I always get involved and show my ideas when I get questions from the teacher and when the teacher lets the students do the group discussion. I also learn some new things from them; we share and build relationships with each other as friends. They are so friendly and respectful. Last week on Saturday, I joined Community Date Season 2, or CSL, on the PUC campus. And it is also the only programme at PUC. I really enjoy meeting new people and exchanging information with them. That is a very interesting event. They talk about volunteering with the school to get the opportunity to go travelling in another county and earn self-credit; it is not much different from my CRST NGO. Furthermore, I think that our NGO activities benefit more because we are always professional and can build our leadership skills. But it's all good. Rather, I would like to share with you about my TDSO class on the CRST campus. I just finished my final exam this week. In my final class, we created the project and did the gallery talk. And for my group, I will talk about the solar charger. I am excited to spend time with this class. I can build my confidence to talk and build connections with each other. And I would like to say thank you so much to the Aviv family and sponsors that support me every time. I am committed to doing the best I can to build a brighter life in the future.

Moreover, I participated in MBM Day. That is a very nice day, and I can help make them smile. Everyone gets involved so much, and we also have participation from Reach students as well. I also invited my teacher to join as well. We have many likes; the leader is divided into 12 groups, and our team of fast and skilled bicycle repairers has repaired more than 10 bicycles. And in the afternoon, we enjoyed a nice launch and were sweet together. After we finished, we had 170 bikes. It was a very big amount for us. I appreciate everyone, including myself. Then we enjoyed taking group photos together.

On the 7th, I joined the sharing class with Bong Sreyleab and Bong Heng, who are my senior students. I learned about the experience from them and how to fight with it, and what I can apply in my daily life is the growth mindset. I face bad words from my environment every single day, especially when I go to my hometown. They like this about

me, but some people appreciate it and pose me up. I did not accept that they said something bad about me and my family. I don't know why they also have nothing. How can they bully me and my family? Anyway, I really don't care, and I always thought they had too little education. So, what they said cannot affect my feelings anymore. I get so inspired from this workshop. I really thank and appreciate the Business Class team for their great job making this class happen.

I would like to share with you the weather in Cambodia right now. This is the rainy season, and it was flashy almost every day with strong winds. Some days I could not go anywhere, and some days the teacher canceled the class. For fear of accidents during heavy rains, I could not use the Internet. And I have to bring my raincoat with me every time I go outside. Some days it rains a little; that's what I like, but not heavy rain; it makes me scared.

Last but not least, I just got the new Rotaract T-shirt, I had joined the changeover ceremony of Rotary Passport Melbourne, it was exciting and great to see and hear the great achievements. And we plan to install the Street Library on the 4th. And I will join the Rotaract training in the next month too. That is all that I want to share with you. If you have any questions, please kindly ask me here. I hope you enjoy reading my email.

I have some photos I want you to see below.

My best regards,

Chhengheang
